STRENGTHS

Problem Solving
Self-Learning Ability
Interpersonal Communication
Leadership & Team Management
Working Under Pressure
Professionalism

LANGUAGES

Hebrew – Native
English – Fluent (C2)

INTERESTS

Design · Surfing · Cooking · Gardening · Lifelong Learning

PROFILE

Design graduate with training in UX/UI and graphic design and strong hands-on skills in Figma, the Adobe Creative Suite and AI-powered design tools. Brings a user-first mindset and a sharp visual eye, backed by years of leading teams, coordinating stakeholders and delivering high standards under pressure. Fast self-learner who turns ideas into clear, polished interfaces and visuals.

EXPERIENCE

Shift Manager – Restaurant & Retail Store
2025 – 2026

- Managed daily operations and the full customer experience, spotting friction points in real time and resolving them quickly: the same user-centered thinking behind UX.
- Handled cash, supplier coordination and sales support while keeping service quality high under pressure.

Transportation Department Manager – Israeli Air Force
2022 – 2025

- Led driver teams and transportation operations, owning scheduling, task delegation and day-to-day problem solving.
- Communicated with military commanders and civilian organizations, translating requirements into clear, workable plans.
- Worked daily with Outlook, Word and Excel to organize information and keep complex operations running smoothly.

Youth Counselor – "Halhud HaHaklai" Youth Movement
2018 – 2022

- Designed educational programs and activities tailored to different age groups and needs.
- Led and supervised youth groups, with responsibility for planning, coordination and team collaboration.

INDEPENDENT PURSUITS

Swing Trading (Self-Directed)
2025 – Present

- Analyze price charts and market patterns to time entries and exits and manage risk across multi-day to multi-week positions.
- Built disciplined, data-driven decision-making, patience and emotional control under pressure.
- Sharpened skills that carry directly into design: reading dense visual data quickly, spotting patterns, and understanding how users interpret charts and dashboards, a strong fit for fintech and data-heavy products.

EDUCATION & COURSES

Claude Design Course & Design With AI
2026

Hands-on course on integrating AI into the design process. Practiced using Claude and generative AI tools to explore concepts, write effective design prompts, build interface layouts and prototypes, and speed up production from first idea to finished visual, while applying human design judgment to refine and elevate AI output.

Graphic Design Course – HackerU
Core training in visual design, typography, color, layout and the Adobe Creative Suite.

Chart Reading Course
Technical analysis: reading price charts, trends, support and resistance, and common chart patterns.
